

# Labor Strategy Workshop

## *Building the Bridge Between Operational Best Practices and Employee Morale*

The Core Practice Labor Strategy Workshop is a half-day interactive meeting that uncovers hidden costs relating to operations and labor strategy. It is an abbreviated master class in labor management. Our strategic consulting group will review your current practices and share real options to rapidly capture cost savings. Your management team will leave with new insights and real examples of solutions like flexible scheduling, low cost labor practices, and inventory and customer service optimization. Three key areas will be covered during the session:

### Best Practices

With over 20 years experience in a wide variety of industries, the Core Practice team will cater the workshop to your specific challenges. By looking at proven success stories from market leaders, your management team will learn both new ways to improve operations and how to avoid expensive mistakes. This section of the workshop will also review your specific labor cost structure and strategies to minimize adverse costs. Example schedules will be drawn to help clarify your challenges. The management team will be encouraged to debate all of the points.

### Uncovering Hidden Costs

Core Practice constantly updates its database of the top hidden costs segmented by industry. Whether the management team is concerned about overtime, idle time, missed revenue opportunities, employee morale, productivity, customer service, flexibility, or support scheduling (to name a few) this section of the workshop will provide focus. Often management teams are concerned about such a wide range of issues that major opportunities get lost in the shuffle. This exercise will prioritize key initiatives, attach dollars to them, and the group will work on next steps.

### Capturing the Value

Opportunities do not hold any value if they cannot be implemented. At the end of the workshop Core Practice will share implementation secrets, change management strategies, and a proven methodology. Employee benchmarks will provide context around the difficulties of change management in shift work operations and highlight several areas of sensitivity.

Core Practice is a leading provider of operational and labor strategy consulting services with over 20 years of experience designing, developing, and implementing innovative labor solutions. Core Practice's labor strategies combine the best people with the right equipment at the right time and provide clients with a competitive advantage. Core Practice has worked extensively with clients in manufacturing, distribution, contact center, and mining industries. To learn more about Core Practice and what we do, please contact:
